* 1: For fill up(Under 1L)by mixture can use DEXRON(ATF premiam)(fill up to line ATF's color is light brown).

* 2: Please be alerted to change ATF because of complicated structure.

* 3: Please do not change, it is the oil for hydraulic clutch for selespeed.

* 4: When used for a vehicle of DEXRON VI, the oil life becomes short, there is a possibility that saving fuel efficiency cannot be demonstrated.

■ Please do not change ATF if you have not changed it since 5 years ago, or parallel import car, old car which didn't drive long distance
